Part VI: Summary of the risk management plan

Summary of risk management plan for Tigecycline EQL Pharma, 50 mg powder for solution for infusion

This is a summary of the risk management plan (RMP) for Tigecycline EQL Pharma, 50 mg powder for solution for infusion. The RMP details important risks of Tigecycline EQL Pharma, 50 mg powder for solution for infusion, how these risks can be minimised, and how more information will be obtained about Tigecycline EQL Pharma, 50 mg powder for solution for infusion's risks and uncertainties (missing information).

Tigecycline EQL Pharma, 50 mg powder for solution for infusion's summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how Tigecycline EQL Pharma, 50 mg powder for solution for infusion should be used.

I. The medicine and what it is used for

Tigecycline EQL Pharma, 50 mg powder for solution for infusion is authorised for complicated skin and soft tissue infections (cSSTI), excluding diabetic foot infections and for complicated intra-abdominal infections (cIAI) in adults and children from the age of eight years (see SmPC for the full indication). It contains tigecycline as the active substance and it is given by intravenous infusion over 30 to 60 minutes.

II. Risks associated with the medicine and activities to minimise or further characterise the risks

Important risks of Tigecycline EQL Pharma, 50 mg powder for solution for infusion, together with measures to minimise such risks and the proposed studies for learning more about Tigecycline EQL Pharma 's risks, are outlined below.

- Specific information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- The authorised pack size the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- The medicine's legal status the way a medicine is supplied to the patient (e.g. with or without prescription) can help to minimise its risks.

Together, these measures constitute *routine risk minimisation* measures.

In addition to these measures, information about adverse reactions is collected continuously and regularly analysed, including PSUR assessment - so that immediate action can be taken as necessary. These measures constitute *routine pharmacovigilance activities*.

II.A List of important risks and missing information

Important risks of Tigecycline EQL Pharma, 50 mg powder for solution for infusion are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely administered. Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Tigecycline EQL Pharma, 50 mg powder for solution for infusion. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation. Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g. on the long-term use of the medicine);

List of important risks and missing information	
Important identified risks	Thrombocytopenia
	Hepatotoxicity
	Anaphylaxis
	Pancreatitis
	Superinfection
Important potential risks	QTc prolongation / Torsades de pointes
	Clostridium difficile associated diarrhoea and pseudomembranous
	colitis
	Lack of efficacy
Missing information	Use in paediatric patients < 8 years of age
	Use in pregnant and breast-feeding women
	Use in patients on immunosuppressant therapy
	Use in patients with neutropenia

II.B Summary of important risks

The safety information in the proposed product information is aligned to the reference product.

II.C Post-authorisation development plan

II.C.1 Studies which are conditions of the marketing authorisation

There are no studies which are conditions of the marketing authorisation or specific obligation of Tigecycline EQL Pharma, 50 mg powder for solution for infusion.

II.C.2 Other studies in post-authorisation development plan

There are no studies required for Tigecycline EQL Pharma 50 mg powder for solution for infusion.
