Til rette vedkommende

Vi skriver til dig for at informere dig om, at Biomet Orthopaedics Switzerland GmbH[HE1] har iværksat afhjælpende foranstaltninger med henblik på at seponere Optipac®-knoglecement i alle størrelser fremstillet siden januar 2014 (referencer og berørte partier er identificeret i bilag 2).

Billede 1: Optipac-produkt

I forbindelse med de indledende undersøgelser blev det fastslået, at Biomet Orthopaedics ikke kan garantere, at steriliseringsprocessen for Optipac-produktet til fulde overholder myndighedernes krav.

Følgende er potentielle risici forbundet med problemet:

Risici		
Beskriv umiddelbare helbredskonsekvenser (tilskadecomst eller sygdom), som kan følge af brug af eller eksponering for problemet med anordningen.	Mest sandsynlige	I værste fald
	Ingen	Ingen
Beskriv langsigtede helbredskonsekvenser (tilskadecomst eller sygdom), som kan følge af brug af eller eksponering for problemet med anordningen.	Mest sandsynlige	I værste fald
	Inflammation Smerter Tidlig infektion Potentiel hævelse omkring leddet	Bakteriæmi (aggressive bakterier/smittekim af forskellig sværhedsgrad) Infektion omkring protesen, der kan resultere i inflammation omkring protesen, eller potentiel non-osseo-integration, der i begge tilfælde kan resultere i et nyt kirurgisk indgreb (pga. infektion). Potentiel, uopdaget, langsigtet infektion, sepsis (med muligt dødsfald afhængig af sværhedsgrad).

En gennemgang af klager over Optipac-produktet blev udført. Den indberettede andel af Optipac-produkter er 0,0004 % for infektioner. Det er op til en kirurg/læge at vurdere, om patientopfølgning er nødvendig i forbindelse med dette problem, men baseret på de nuværende resultater synes der ikke at være behov for yderligere patientopfølgning ud over den normale patientopfølgningsprotokol.

Ifølge vores optegnelser har du modtaget et eller flere af de berørte produkter.

Kirurgens/lægens/klinikkens forpligtelser:

1. Gennemlæs denne skrivelse, og sørg for, at alt berørt personale er bekendt med indholdet.
