Dear Valued Integra Distributor,

Integra LifeSciences is voluntarily issuing this Field Safety Notice for the recall of Codman® Surgical Patties & Surgical Strips products listed in Table 1 below.

During an internal investigation, Integra LifeSciences identified higher-than-expected levels of endotoxin within the raw material used to produce Codman Surgical Patties and Strips that may have resulted in out-of-specification levels of endotoxin in those finished goods. Consequently, while the endotoxin levels identified were higher than expected, the possibility of adverse health consequences actually occurring remains remote (see Risk to Health below).

Risk to health

Per the Health Hazard Evaluation conducted for this issue, adverse health consequences resulting from higher-than-expected levels of endotoxins may include mild febrile response, and/or mild local transitory inflammation, hypotension, or nausea.

If you have already used the products affected by this recall and standard operative care was followed, there is no additional patient follow-up required.

Please note that there have been zero (0) complaints received relating to the potential harms identified in the "Risk to Health" section.
