

STRATEGY

2022-2026

Value-adding knowledge sharing and administrative processes

We will invest in dialogue and communication with the public and society to become the primary source of knowledge on medicines and medical devices

We will apply our specialist skills and professionalism to enhance quality and ensure timely deliverables

International involvement

We will increase our influence in relevant international forums to improve the framework for development, use and availability of medicines and medical devices

We will strengthen our international collaboration

Mission

We create value for people, animals and society through efficient, safe, and available medicines and safe medical devices

Vision

Leading in national and international collaboration

Better use of data and new technology

We will strengthen the use of data and new technology to support professional assessments and efficient processes

We will upgrade our skills to support innovation in the life sciences ecosystem

Great place to work

We want to grow even more as a great place to work with psychological well-being as essential to the foundation

We will expand as a sustainable workplace, offering flexibility and development opportunities

Statements that we live by:

We have a curious, experimental and learning mindset

We are open-minded and collaborate with professionalism and trust in one another

We are a diverse, inclusive and equal workplace
