### **Risk Management Plan Imatinib Version 6.0**

# PART VI: SUMMARY OF THE RISK MANAGEMENT PLAN

#### Summary of Risk Management Plan for Imatinib Viatris (imatinib)

This is a summary of the risk management plan (RMP) for imatinib Viatris. The RMP details important risks of imatinib, how these risks can be minimised, and how more information will be obtained about imatinib's risks and uncertainties (missing information).

Imatinib Viatris' summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how it should be used.

Important new concerns or changes to the current ones will be included in updates of imatinib Viatris' RMP.

### I. The Medicine and What it is Used For

Imatinib Viatris is authorised for Chronic Myeloid leukaemia (CML), Acute Lymphoblastic leukaemia (ALL) and Gastrointestinal Stromal Tumors (GIST) (see SmPC for the full indication). It contains imatinib as the active substance and it is given by oral route of administration.

### II. Risks Associated with the Medicine and Activities to Minimise or Further Characterise the Risks

Important risks of imatinib Viatris, together with measures to minimise such risks and the proposed studies for learning more about imatinib Viatris' risks, are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific Information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- The authorised pack size the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- The medicine's legal status the way a medicine is supplied to the public (e.g. with or without prescription) can help to minimises its risks.

Together, these measures constitute routine risk minimisation measures.

In addition to these measures, information about adverse events is collected continuously and regularly analysed, so that immediate action can be taken as necessary. These measures constitute routine pharmacovigilance activities.

### **II.A List of Important Risks and Missing Information**

Important risks of imatinib Viatris are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely taken by patients. Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of imatinib Viatris. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation.

EU RMP Template v 9.1, Effective 28-Aug-2023

All information contained in this document is company property and confidential to the regulatory authority. It must not be divulged to any other party without the written consent of the company.

## **Risk Management Plan Imatinib Version 6.0**

Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g. on the long-term use of the medicine/use in special patient populations etc.);

List of Important Risks and Missing Information	
Important Identified Risks	• None
Important Potential Risks	<ul><li>Second Primary Malignancy</li><li>Tolerability during pregnancy and pregnancy outcomes</li></ul>
Missing Information	Paediatric patients below 2 years of age

 Table 5: Part VI.1- Summary of safety concerns

### **II.B Summary of Important Risks**

The safety information in the proposed Product Information is aligned to the reference medicinal product.

## **II.C Post-Authorisation Development Plan**

## II.C.1 Studies Which are Conditions of the Marketing Authorisation

There are no studies which are conditions of the marketing authorisation or specific obligation of imatinib Viatris.

## **II.C.2** Other Studies in Post-Authorisation Development Plan

There are no studies required for imatinib Viatris.
