

Part VI: Summary of the risk management plan

Summary of risk management plan Azacitidine Ascenders 25 mg/mL powder for suspension for Injection (Azacitidine):

This is a summary of the risk management plan (RMP) for Azacitidine Ascenders 25 mg/mL powder for suspension for Injection. The RMP details important risks Azacitidine Ascenders 25 mg/mL powder for suspension for injection, how these risks can be minimised, and how more information will be obtained about Azacitidine Ascenders 25 mg/mL powder for suspension for injection 's risks and uncertainties (missing information).

Azacitidine Ascenders 25 mg/mL powder for suspension for injection 's summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how Azacitidine Ascenders 25 mg/mL powder for suspension for injection should be used.

I. The medicine and what it is used for

Azacitidine Ascenders 25 mg/mL powder for suspension for injection is indicated for the treatment of adult patients who are not eligible for haematopoietic stem cell transplantation (HSCT) with:

- intermediate-2 and high-risk myelodysplastic syndromes (MDS) according to the International Prognostic Scoring System (IPSS),
- chronic myelomonocytic leukaemia (CMML) with 10-29 % marrow blasts without myeloproliferative disorder,
- acute myeloid leukaemia (AML) with 20-30 % blasts and multi-lineage dysplasia, according to World Health Organisation (WHO) classification,
- AML with >30% marrow blasts according to the WHO classification.

II. Risks associated with the medicine and activities to minimise or further characterise the risks

Important risks of Azacitidine Ascenders 25 mg/mL powder for suspension for injection, together with measures to minimise such risks and the proposed studies for learning more Azacitidine Ascenders 25 mg/mL powder for suspension for injection's risks, are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- The authorised pack size the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- The medicine's legal status the way a medicine is supplied to the patient (e.g. with or without prescription) can help to minimise its risks.

Together, these measures constitute *routine risk minimisation* measures.

II. A List of important risks and missing information

Important risks of Azacitidine Ascenders 25 mg/mL powder for suspension for injection are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely taken. Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Azacitidine Ascenders 25 mg/mL powder for suspension for injection. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation. Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g. on the long-term use of the medicine);

Summary of safety concerns	
Important identified risks	<input type="checkbox"/> Bleeding events (haemorrhagic events) <input type="checkbox"/> Infections
Important potential risks	<input type="checkbox"/> None
Missing information	<input type="checkbox"/> None

II.B Summary of important risks

The safety information in the proposed Product Information is aligned to the reference medicinal product.

II. C Post-authorisation development plan

There is no post authorisation developmental plan for this product.
