#### Part VI: Summary of risk management plan for Abiraterone 500 mg film coated tablets

This is a summary of the risk management plan (RMP) for Abiraterone 500 mg film coated tablets. The RMP details important risks of Abiraterone 500 mg film coated tablets, how these risks can be minimised, and how more information will be obtained about Abiraterone 500 mg film coated tablets risks and uncertainties (missing information).

Abiraterone 500 mg film coated tablets' summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how Abiraterone 500 mg film coated tablets should be used.

Important new concerns or changes to the current ones will be included in updates of RMP for Abiraterone 500 mg film coated tablets.

#### I. The medicine and what it is used for

Abiraterone 500 mg film coated tablets is authorised to treat prostate cancer in adult men that has spread to other parts of the body. Abiraterone 500 mg film coated tablets stops your body from making testosterone; this can slow the growth of prostate cancer. It contains Abiraterone as the active substance, and it is given by oral route.

# II. Risks associated with the medicine and activities to minimise or further characterise the risks

Important risks of Abiraterone 500 mg film coated tablets together with measures to minimise such risks are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- •The authorised pack size the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- •The medicine's legal status the way a medicine is supplied to the patient (e.g. with or without prescription) can help to minimise its risks.

Confidential

Together, these measures constitute routine risk minimisation measures.

In addition to these measures, information about adverse reactions is collected continuously and regularly analysed, so that immediate action can be taken as necessary. These measures constitute routine pharmacovigilance activities.

If important information that may affect the safe use of Abiraterone 500 mg film coated tablets is not yet available, it is listed under 'missing information' below.

#### II.A List of important risks and missing information

Important risks of Abiraterone 500 mg film coated tablets are risks that need special risk management activities to further investigate or minimise the risks, so that the medicinal product can be safely administered.

Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Abiraterone 500 mg film coated tablets.

Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation.

Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g. on the long-term use of the medicine).

List of important risks and missing information	
Important identified risks	-Hepatotoxicity
	-Cardiac disorders
	-Osteoporosis including osteoporosis-related
	fractures
	-Rhabdomyolysis/Myopathy
	-Allergic alveolitis
	-Increased exposure with food
Important potential risks	-Anaemia
	-Cataract
	-Drug-drug interaction (CYP2D6)
Missing information	-Use in patients with active or symptomatic viral
	hepatitis
	-Use in patients with moderate/severe hepatic
	impairment and chronic liver disease
	-Use in patients with severe renal impairment
	-Use in patients with heart disease as evidenced by
	myocardial infarction, or arterial thrombotic events in
	the past 6 months, severe or unstable angina, or New
	York Heart Association Class III or IV heart disease or
	cardiac ejection fraction measurement of <50%.

## **II.B Summary of important risks**

The safety information in the proposed Product Information is aligned to the reference medicinal product.

## II.C Post-authorisation development plan

## II.C.1 Studies which are conditions of the marketing authorization

There are no studies which are conditions of the marketing authorisation or specific obligation of Abiraterone 500 mg film coated tablets.

## II.C.2 Other studies in post-authorisation development plan

There are no studies required for Abiraterone 500 mg film coated tablets.
