Part VI: Summary of the risk management plan

Summary of risk management plan for Sacubitril/Valsartan film-coated tablets (Sacubitril/Valsartan)

This is a summary of the risk management plan (RMP) for Sacubitril/Valsartan film-coated tablets. The RMP details important risks of Sacubitril/Valsartan film-coated tablets, how these risks can be minimised, and how more information will be obtained about Sacubitril/Valsartan film-coated tablets risks and uncertainties (missing information).

Sacubitril/Valsartan film-coated tablets summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how Sacubitril/Valsartan film-coated tablets should be used.

Important new concerns or changes to the current ones will be included in updates of Sacubitril/Valsartan film-coated tablets RMP.

I. The medicine and what it is used for

Sacubitril/Valsartan film-coated tablets are indicated in adult patients for treatment of symptomatic chronic heart failure with reduced ejection fraction Sacubitril/Valsartan film-coated tablets are also indicated in children and adolescents aged one year or older for treatment of symptomatic chronic heart failure with left ventricular systolic dysfunction (see SmPC for the full indication). It contains Sacubitril and Valsartan as the active substances and it is given by mouth.

II. Risks associated with the medicine and activities to minimise or further characterise the risks

Important risks of Sacubitril/Valsartan film-coated tablets, together with measures to minimise such risks and the proposed studies for learning more about Sacubitril/Valsartan film-coated tablets risks, are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- The authorised pack size the amount of medicine in a pack is chosen so to ensure that the
 medicine is used correctly;
- The medicine's legal status the way a medicine is supplied to the patient (e.g. with or without prescription) can help to minimise its risks.

Together, these measures constitute routine risk minimisation measures.

If important information that may affect the safe use of Sacubitril/Valsartan film-coated tablets is not yet available, it is listed under 'missing information' below.

II.A List of important risks and missing information

Important risks of Sacubitril/Valsartan film-coated tablets are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely taken. Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Sacubitril/Valsartan film-coated tablets. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation. Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g., on the long-term use of the medicine);

List of important risks and missing information	
Important identified risks	Embryo-fetal toxicity/lethality
Important potential risks	 Neonatal/infantile toxicity through exposure from breast milk Cognitive impairment
Missing information	 Long term use of LCZ696 in HF patients •

II.B Summary of important risks

The safety information in the proposed Product Information is aligned to the reference medicinal product.

II.C Post-authorisation development plan

II.C.1 Studies which are conditions of the marketing authorisation

There are no studies which are conditions of the marketing authorisation or specific obligation of Sacubitril/Valsartan film-coated tablets.

II.C.2 Other studies in post-authorisation development plan

There are no studies required for Sacubitril/Valsartan film-coated tablets.
