

Part VI: Summary of the risk management plan

Summary of risk management plan for Figozap film-coated tablets, 5 and 10 mg (dapagliflozin)

This is a summary of the risk management plan (RMP) for Figozap film-coated tablets, 5 and 10 mg. The RMP details important risks of Figozap film-coated tablets, 5 and 10 mg, how these risks can be minimised, and how more information will be obtained about Figozap film-coated tablets, 5 and 10 mg risks and uncertainties (missing information).

Figozap film-coated tablets, 5 and 10 mg summary of product characteristics (SmPC) and its package leaflet give essential information to healthcare professionals and patients on how Figozap film-coated tablets, 5 and 10 mg should be used.

I. The medicine and what it is used for

Figozap film-coated tablets, 5 and 10 mg is authorised for treatment of Type 2 diabetes mellitus in adults and children aged 10 years and above as an adjunct to diet and exercise, for treatment of symptomatic chronic heart failure in adults and for treatment of chronic kidney disease. (see SmPC for the full indication). It contains dapagliflozin as the active substance and it is given by oral administration.

II. Risks associated with the medicine and activities to minimise or further characterise the risks

Important risks of Figozap, together with measures to minimise such risks and the proposed studies for learning more about Figozap `s risks, are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific information, such as warnings, precautions, and advice on correct use, in the package leaflet and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- The authorised pack size — the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- The medicine's legal status — the way a medicine is supplied to the patient (e.g. prescription only medicine) can help to minimise its risks.

Together, these measures constitute *routine risk minimisation* measures.

In addition to these measures, information about adverse reactions is collected continuously and regularly analysed, including PSUR assessment so that immediate action can be taken as necessary. These measures constitute *routine pharmacovigilance activities*.

If important information that may affect the safe use of Figozap is not yet available, it is listed under `missing information' below.

II.A List of important risks and missing information

Important risks of Figozap film-coated tablets, 5 and 10 mg are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely administered.

Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Figozap. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation. Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected.

List of important risks and missing information	
Important identified risks	<ul style="list-style-type: none">• Diabetic Ketoacidosis including events with atypical presentation
Important potential risks	<ul style="list-style-type: none">• Bladder cancer• Breast cancer• Prostate cancer• Lower limb amputation
Missing information	<ul style="list-style-type: none">• Use in patients with NYHA class IV• Long-term safety in the paediatric population (aged 10 years and above)

II.B Summary of important risks

The safety information in the proposed Product Information (SPC and PIL) of Figozap film-coated tablets, 5 and 10 mg is aligned to the reference medicinal product.

II.C Post-authorisation development plan

II.C.1 Studies which are conditions of the marketing authorisation

There are no studies which are conditions of the marketing authorisation or specific obligation of Figozap film-coated tablets, 5 and 10 mg.

II.C.2 Other studies in post-authorisation development plan

There are no studies required for Figozap film-coated tablets, 5 and 10 mg.
