

## **VIGTIG PRODUKTINFORMATION** **SLUTBRUGERE**

<b>Handelsnavn:</b>	Sugekatetre, gastroenterale slanger, intermitterende urinvejskatetre, sterile urinopsamlingsposer (se bilag I for handelsnavn og komplette oplysninger)
<b>Udstedelsesdato:</b>	24.08.2018
<b>REF-nr.:</b>	Se bilag 1
<b>FSCA-ID:</b>	2018-005 Fase 2
<b>Type af handling:</b>	Tilbagekaldelse/bortskaffelse af produkt

**E-mail til tilbagekaldelsescenter:** [convatecproductrecall@stericycle.com](mailto:convatecproductrecall@stericycle.com)

**Bemærk, at denne meddelelse kun gælder for specifikke produktkoder og ikke berører alle produktkoder for sugekatetre, gastroenterale slanger, intermitterende urinvejskatetre, sterile urinopsamlingsposer.**

---

### **Beskrivelse af problemet:**

ConvaTec har frivilligt iværksat en tilbagekaldelse af specifikke produktkoder for sugekatetre, gastroenterale slanger, intermitterende urinvejskatetre, sterile urinopsamlingsposer.

En intern vurdering af integriteten af produktemballagen har bekræftet, at disse produkter ikke lever op til vores eller vores kunders forventninger. Produktets emballage bestod ikke en transporttest, hvilket bekræfter risikoen for et brud på den sterile barriere. Brug af et ikke-sterilt produkt på patienten kan udsætte patienten for infektiøse stoffer, hvilket øger patientens risiko for at udvikle en infektion. ConvaTec har ikke modtaget nogen rapporter om hændelser vedrørende problemer med emballagens forsegling.

**Sugekatetre er beregnet til oro-nasopgaryngeal og trakeobronkial sugning af de øvre og nedre luftveje for at fjerne overskydende sekret hos patienter, som er ude af stand til selv at hoste dette sekret op. Sugekatetre er sterile anordninger til brug på én patient og til én procedure, der er beregnet til at blive indirekte forbundet med en aktiv medicinsk anordning.**

**Gastroenterale slanger:** Duodenale slanger, maveslanger og ernæringssonder er engangsanordninger, der kan anlægges gennem næsen eller munden via spiserøret til mavesækken eller tolvfingertarmen med henblik på udtømning af maveindhold, dekompression af mavesækken eller tolvfingertarmen, for at tage en prøve af maveindholdet, indgive medicin eller væske og give sondeernæring.

**Intermitterende urinkatetre** skaber en midlertidig adgang til at tømme blæren for urin. De er beregnet til at blive indført intermitterende via urinrøret og videre op til blæren med henblik på blæretømning. De er alene udviklet til kortvarig, intermitterende brug og må ikke efterlades i kroppen (der er ingen ballon på spidsen hvormed kateteret kan holdes i blæren.) De er kun beregnet til engangsbrug. Målet med intermitterende kateterisation ved hjælp af urinvejskatetre er at tømme blæren helt og således forhindre urinvejsinfektioner.

**Sterile urinopsamlingsposer** er sterile, ikke-invasive engangsanordninger beregnet til at opsamle urin (diurese) eller skyllevæsker, når de er fastgjort til et indlagt kateter. Urinopsamlingsposer er beregnet til opsamling af urin hos kateteriserede patienter. Urinopsamlingsposer er også beregnet til at blive brugt til at overvåge urin- eller væskeinput eller -output.

Kun de produktkoder, der er anført i denne meddelelse, har potentiale for brud på emballagens sterile barriere.

Af denne årsag, og for at forebygge en eventuel risiko for personskade, må ingen af de berørte produkter anvendes.

**Fremgangsmåde for identifikation af produkter:**

Den eneste måde at identificere berørte produkter på er at sammenligne produktkode og fremstillingsdato med listen over tilbagekaldte produkter (se bilag 1). Der er ingen andre synlige forskelle mellem berørte og ikke-berørte produkter.

I bilag 2 findes et eksempel på emballagemærkning, hvor placeringen af produktkoden og fremstillingsdatoen på mærkaterne er fremhævet. De sidder på den primære emballage og forsendelsesæsken. Produktkoden (referencenummer) begynder med ordet 'REF' og fremstillingsdatoen begynder med og er i ÅÅÅÅ-M  M-DD-format

**Anbefalet handling, som slutbrugeren skal iværksætte.**

Vores fortegninger viser, at I har modtaget et eller flere af de berørte produkter. Følg trinnene nedenfor:

1. Hold straks op med at bruge nogen af de berørte produkter, der er defineret i dette dokument.
2. Tjek lagerbeholdning og sørg for, at alle berørte produkter på lager sættes i karantæne.
3. Udfyld den vedlagte "Svarformular ved tilbagekaldelse for SLUTBRUGERE", som skal videresendes til jeres **distributør snarest** muligt.
4. Kontakt distributøren for at aftale returnering af de berørte produkter, hvis sådanne forefindes hos jer, samt eventuel kreditering. Der skal placeres nye ordrer.

**I BEDES RETURNERE DE UDFYLDTE FORMULARER SNAREST MULIGT.**

Fortsæt med at indberette eventuelle uønskede hændelser i forbindelse med dette produkt til ConvaTecs Customer Care Line (se listen over regionale kontaktpersoner for nærmere oplysninger).

**Videresendelse af denne vigtige produktinformation:**

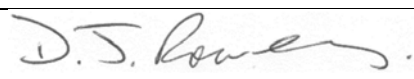

Denne produktinformation skal sendes til alle andre, som har modtaget de berørte produkter i jeres organisation, eller til eventuelle andre organisationer, der måtte have modtaget eksemplarer af de berørte produkter.

ConvaTec har et stærkt ønske om at levere produkter og tjenester af høj kvalitet til vores kunder, og vi beklager oprigtigt eventuelle gener, denne meddelelse måtte medføre.

Hvis du har spørgsmål vedrørende denne tilbagekaldelse, skal du kontakte tilbagekaldelsescentret. Hvis I har brug for anden support, kan I kontakte distributøren eller den lokale repræsentant for ConvaTec. Se listen over kontaktpersoner for nærmere oplysninger.

De relevante nationale myndigheder er blevet underrettet om denne sikkerhedsrelaterede korrigerende handling for produkter på markedet.
